Ref: ALFA's COVID-19 Antigen Test

To Whom It May Concern:

This letter is to certify that ALFA's COVID-19 Antigen Test targets the conservative areas in both Nucleocapsid (NP) and Spike (S) proteins which can detect the coronavirus variants of concerns; (e.g., Alpha, Beta, Gamma, Delta, Omicron and recently discovered in France as a Cameroonian in origin, tentatively identified B.1.640.2).

Please contact me if you have any questions.

Sincerely,

Chai Bunyagidj, Ph.D.  
President & CEO
